

CDK - MyPriceLink (MPL) integration workflows summary

CDK Quick Pricing: Get MPL pricing in Drive (for non-CollisionLink transactions)

For wholesale shops, internal body shops or other customers who have pricing from an estimate:

In CDK Drive - Function I, Q or Pro:
Enter parts. When prompted enter the MPL quote # or last 8 of the VIN to select the quote. Continue entering parts. List prices will automatically display.

Note: MPL quotes provide list prices based on the estimate attributes = best OEM pricing strategies.

For walk-ins, Service Dept. or body shops who *do not* have pricing from an estimate:

In CDK Drive – Function P, I, Q or Pro:
Enter parts, when prompted enter N to not use an MPL quote. The MPL List price will *not* be based on an estimate.

Note: If this option is used when your customer has a collision estimate, list prices may not match, forcing your customer to perform a costly supplement to their estimate.

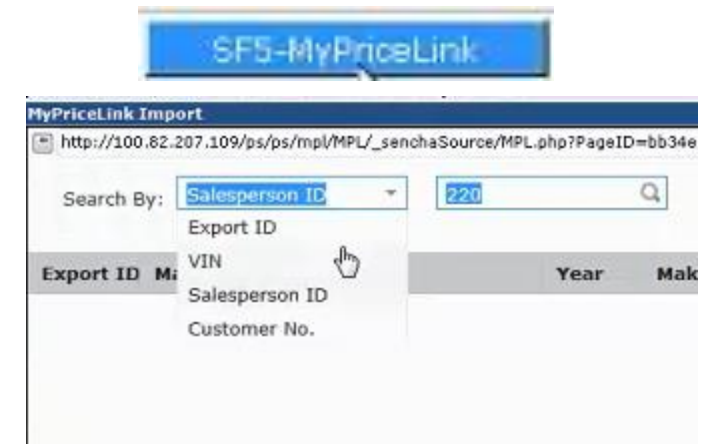

CDK Prompt: 

MPL integration requires a CollisionLink subscription. No DMS fees apply.

Use “Export to DMS” in CollisionLink

Process your CollisionLink quote as normal. Drop parts to be sold then click  **Export to DMS**

In CDK DRIVE: Import quote using Shift-F5 from Function I, Q or Pro.

Note: Export to DMS is also available in Quote Details page when using MyPriceLink in OEC.
